

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A medical information management system, comprising:

an information acquisition device;

a computer coupled to the information acquisition device, the computer including logic for receiving information from the information acquisition device, for setting a reconsider flag to indicate that new information is available for informing a user of arrival of the new information while the user is reviewing associated to a study to which the new information corresponds, and for appending the new information to the study without informing the user if the study has not been reviewed and for not affecting a status of the reconsider flag if the study is unread; and

a memory element associated with the computer, where the

memory element stores the information and associates the
information with the study; ~~where new information transferred to~~
~~the computer is associated with the study, and the study is flagged~~
~~to indicate that the new information is available.~~

2.(Original) The medical information management system of
claim 1, wherein the information includes at least one of
ultrasound image information, medical image information, patient
measurements, calculations, findings, comments, waveforms, chart
records, audio recordings, Doppler audio, Doppler flow sounds or
heart sounds, Doppler audio, and a medical study report.

3.(Currently Amended) The medical information management
system of claim 2, further comprising a database, where the
database includes a plurality of flags, and ~~at least one of the~~
~~reconsider flags flag~~ is used to indicate to said user of the
medical information management system that the new information has
been associated with the study.

4.(Previously Presented) The medical information management

system of claim 3, further comprising a client application, the client application further comprising a user interface configured to present to the user of the medical information management system an indication that the new information has been associated with the study.

Claim 5 (Canceled)

6. (Previously Presented) The medical information management system of claim 4, where the client application informs the user of the arrival of further new information pertaining to a further study that the user is not reviewing.

7. (Currently Amended) A method for adding new information to a study, the method comprising the acts of:

- acquiring information using an information acquisition device;
- forwarding the information to a computer;
- storing the information;
- associating the information with the study;
- transferring the new information to the computer;

associating the new information with the study;
~~indicating, in the study, setting a reconsider flag to~~
~~indicate in the study indicating, in the study, that the new~~
~~information is available without notifying a user if the study has~~
~~not been reviewed; and~~
~~informing the user of arrival of the new information when the~~
~~user is reviewing the study to which the new information~~
~~corresponds not affecting a status of the reconsider flag if the~~
~~study is unread.~~

8. (Original) The method of claim 7, wherein the information includes at least one of ultrasound image information, medical image information, patient measurements, findings, calculations, comments, waveforms, chart records, audio recordings, Doppler audio, Doppler flow sounds or heart sounds, Doppler audio, and a medical study report.

9. (Previously Presented) The method of claim 7, further comprising the act of using a database indicator to indicate to the user that the new information has been associated with the study.

10. (Previously Presented) The method of claim 7, further comprising the act of presenting to the user an indication that the new information has been associated with the study.

Claim 11 (Canceled)

12. (Previously Presented) The method of claim 7, further comprising the act of informing the user of the arrival of further new information pertaining to a further study that the user is not reviewing.

13. (Currently Amended) A computer readable medium having a program for adding new information to a study, the program comprising logic for performing the acts of:

- acquiring information using an information acquisition device;
- forwarding the information to a computer;
- storing the information;
- associating the information with the study;
- transferring the new information to the computer;

associating the new information with the study;

~~indicating, in the study, setting a reconsider flag to
indicate in the study that the new information is available without
notifying a user if the study has not been reviewed; and
informing the user of arrival of the new information when the
user is reviewing the study to which the new information
corresponds not affecting a status of the reconsider flag if the
study is unread.~~

14. (Original) The program of claim 13, wherein the
information includes at least one of ultrasound image information,
medical image information, patient measurements, findings,
calculations, comments, waveforms, chart records, audio recordings,
Doppler audio, Doppler flow sounds or heart sounds, Doppler audio,
and a medical study report.

15. (Previously Presented) The program of claim 13, further
comprising logic for using a database indicator to indicate to the
user that the new information has been associated with the study.

16.(Previously Presented) The program of claim 13, further comprising logic for presenting to the user an indication that the new information has been associated with the study.

Claim 17 (Canceled)

18.(Previously Presented) The program of claim 13, further comprising logic for informing the user of the arrival of further new information pertaining to a further study that the user is not reviewing.

19.(Previously Presented) The medical information management system of claim 1, wherein the computer is configured to inform the user of the arrival of the new information in response to addition of the new information to the study.

20.(Previously Presented) The method of claim 7, wherein the informing act is performed in response to addition of the new information to the study.

21. (Previously Presented) The program of claim 13, wherein the informing act is performed in response to addition of the new information to the study.

22. (Currently Amended) ~~The medical information management system of claim 1, wherein the computer is configured to flag the study if the study has not been reviewed by the user program of claim 13, further comprising logic for informing the user of arrival of the new information when the user is reviewing the study to which the new information corresponds.~~

23. (Currently Amended) The method of claim 7, further comprising the act of ~~setting a flag associated with the study upon arrival of the new information if the study has not been reviewed by the user~~ informing the user of arrival of the new information when the user is reviewing the study to which the new information corresponds.
